

# Verkil<sup>™</sup> Vet

### **Ivermectin BP 1% Oral Solution**

# **Composition**

Each ml **Verkil**<sup>™</sup> **Vet** solution contains Ivermectin BP 10mg.

#### **Indications**

Verkil<sup>™</sup> Vet acts against following endo and ecto parasites:

Endo-parasites: Round worm

Ecto-parasites: Tick, Lice, Mite, Flea

# **Pharmacology**

Verkil<sup>™</sup> Vet have strong affinity to glutamate gated chloride ion channel of nerves and causes hyperpolarization of the nerve or muscles cells and resulting paralysis and killing of parasites. Ivermectin is metabolized in the liver and its metabolites are excreted almost exclusively in the feces over an estimated 12 days with less than 1% of the administered dose excreted in the urine.

# **Dosage & Administration**

Livestock: Pour on slowly from the withers to tail head at a dose of 1 mL/20 kg body weight.

Poultry: Oral dose:

Endo-parasites: 1 mL/ 25 kg body weight (Ivermectin 0.4 mg/kg body weight) for 1 day. if necessary

repeat the dose after 15 days

Ecto-parasites: 1 mL/ 25 kg body weight (Ivermectin 0.4 mg/kg body weight) for 2 days. if necessary

repeat the dose after 15 days.

Pond: 1mL/ decimal (per feet depth of water)

Or, as per direction of registered Veterinarian/Consultant.
