

Tylosef[®] vet

Tylosin tartrate 20% oral powder

DESCRIPTION

Tylosef[®] vet is a water soluble powder containing Tylosin tartrate. Tylosin is active against pathogenic mycoplasma and some Gram-positive & Gram-negative bacteria. Tylosin is well absorbed from the gastrointestinal tract. The excretion of its metabolites is mostly through bile and faeces.

COMPOSITION

Each gm powder contains;
Tylosin tartrate BP 200 mg

MODE OF ACTION

Tylosef[®] vet powder interferes with protein synthesis of microorganisms by reversibly binding to the 50s subunit of its ribosome. As a result, microorganisms cannot survive due to incapability of protein synthesis.

INDICATION

Tylosef[®] vet powder is used for the treatment and control of respiratory infection associated with Tylosin tartrate susceptible microorganisms such as-

- ✓ *Mycoplasma gallisepticum*
- ✓ *Mycoplasma synoviae*

Tylosef[®] vet powder acts against Sinusitis, Airsacculitis, Enzootic pneumonia. It also used against enteritis and other pneumonia oriented infections

DOSAGE AND ADMINISTRATION

	Prevention		Treatment
	Water	Feed	Water
Tylosef[®] vet	0.35-1.35gm/ Liter drinking water for 3-5 days	100gm-50/100kg feed for 3-5 days	2.5gm/ Liter drinking water for 3-5 days
