

Valotil vet

Tylvalosin 62.5% water soluble Powder

Composition

Each gram powder contains
Tylvalosin tartrate INN equivalent to Tylvalosin 625mg

Mode of Action

Tylvalosin is a latest macrolide antibiotic highly effective against Mycoplasma, gram positive bacteria and some gram negative bacteria. It acts by inhibition of bacterial protein synthesis.

Tylvalosin has both bacteriostatic and bactericidal action; it is rapidly absorbed and diffused in tissues which is three times faster than tylosin

Indication

Valotil vet is indicated for the treatment of respiratory disease associated with

- ✓ *Mycoplasma gallisepticum* &
- ✓ *Mycoplasma synoviae*.

Valotil vet also indicated for treatment of diseases associated with

- ✓ *Clostridium perfringes* (Necrotic enteritis) and
- ✓ *Ornithobacterium rhinotracheale* (ORT)

Dosage & Administration

1gm / 5 liter of drinking water (20-25mg/Kg body weight) for consecutive 3-5 days.
Or, as per direction of registered Veterinarian/poultry consultant
