

DIGIMAX[®] POWDER

Appetizer & digestion enhancer for ruminant

Composition

Each gram powder contains;

Ammonium bicarbonate	BP	250 mg
Sodium bicarbonate	BP	650 mg
Nuxvomica	BPC	70 mg
Gentian powder	BPC	15 mg
Ginger powder	BPC	15 mg

Mode of action

1. Ammonium bicarbonate: During high temperature and in different stress conditions, animals suffer from loss of excess bicarbonate ion. **Digimax[®]** powder maintains the bicarbonate ion balance of the livestock.

2. Sodium bicarbonate:**a.** Sodium bicarbonate acts as an antacid and increases the gastric pH. As a result animals get rid of gastritis.

b. If the formation of bicarbonate from the lactic acid by the carbohydrate metabolism delayed/ stopped, excess lactic acid is formed. Sodium bicarbonate helps in decreasing the excess acid.

3. Gentian powder:**a.** Gentian powder is an appetizer & helps in digestion. It also helps in mucous and bile secretion. **b.** It also act as carminative.

4. Ginger powder:**a.** Ginger powder helps against Dyspepsia, Flatulence & Colic. **b.** Helps in secretion of gastric juices.

5. Nuxvomica: Can be used against rheumatic diseases such as; Arthritis, Paralysis, sexual, nervous and mental weakness, etc.

Indications

Digimax[®] powder is effective against various diseases like; ion imbalance, acidemia, gastric, dyspepsia, flatulence, colic, rheumatic diseases like arthritis, paralysis, sexual weakness & nervous weakness.

Dosage & administration

20 gm (1 sachet) **Digimax[®]** powder per 1-2 liters of water should be given to the ruminants by stomach tube or other way for consecutive 2-3 days.
